

FACULTY OF **ENGINEERING**

DEGREE COURSE: **CIVIL AND ENVIRONMENTAL
ENGINEERING BS**

SUBJECT: CONSTRUCTION TECHNIQUES

LECTURER: LUCIO BONAFEDE

E-mail: lucio.bonafede@uniecampus.it

OBJECTIVES

This course will:

1. teach the main elements of constructive principles.
2. Critically analyze the basic elements for the definition of new construction and the most proper solutions for interventions on existing constructions.
3. Investigate the principal characteristics of buildings, with particular attention to the expressive potentialities of different materials.

CONTENTS

The process of construction
Evolution of the rules of construction
Mechanical performance of building elements
The architectonical and structural projects
Conservation, restoration, rehabilitation and maintenance
Architectural and structural analysis of some historical buildings
Building materials and architectonical issues

LEARNING OUTCOMES

The students will:

- understand the different phases of the construction process with regards to building techniques and material characteristics,
- learn the historical evolution of building techniques.

ASSESSMENT

Written exam: multiple choice and open questions
