

FACULTY OF **ENGINEERING**

DEGREE COURSE: **CIVIL AND ENVIRONMENTAL
ENGINEERING BS**

SUBJECT: DESIGN CONSTRUCTION

LECTURER: LUCIO BONAFEDE

E-mail: lucio.bonafede@uniecampus.it

OBJECTIVES

This course will:

1. analyze the main techniques of building industrialization, starting from an historical view of building systems evolution,
2. examine the different building materials in relation with the building types.
3. investigate the problems of quality certification, security and sustainability.

CONTENTS

Evolution of historical building construction systems
Building industrialization with reference to materials
Industrialization of the different building types
Buildings details
Assemblage formalities
The realization of cover
Building a bridge
Industrialization and sustainability
Certification of quality products

LEARNING OUTCOMES

At the end of the course the student will:

- have gained some basic knowledge about industrialized building design (with particular attention to the use of innovative solutions),
- have gained some basic knowledge of the industrial process with regards to infrastructure and buildings,
- be able to analyze any problems and solutions from an economic perspective
- The student must be able to evaluate the main issues with regards to industrialization with reference to the different building types, with a particular attention to materials.

ASSESSMENT

Written exam: multiple choice and open questions
